

About Us

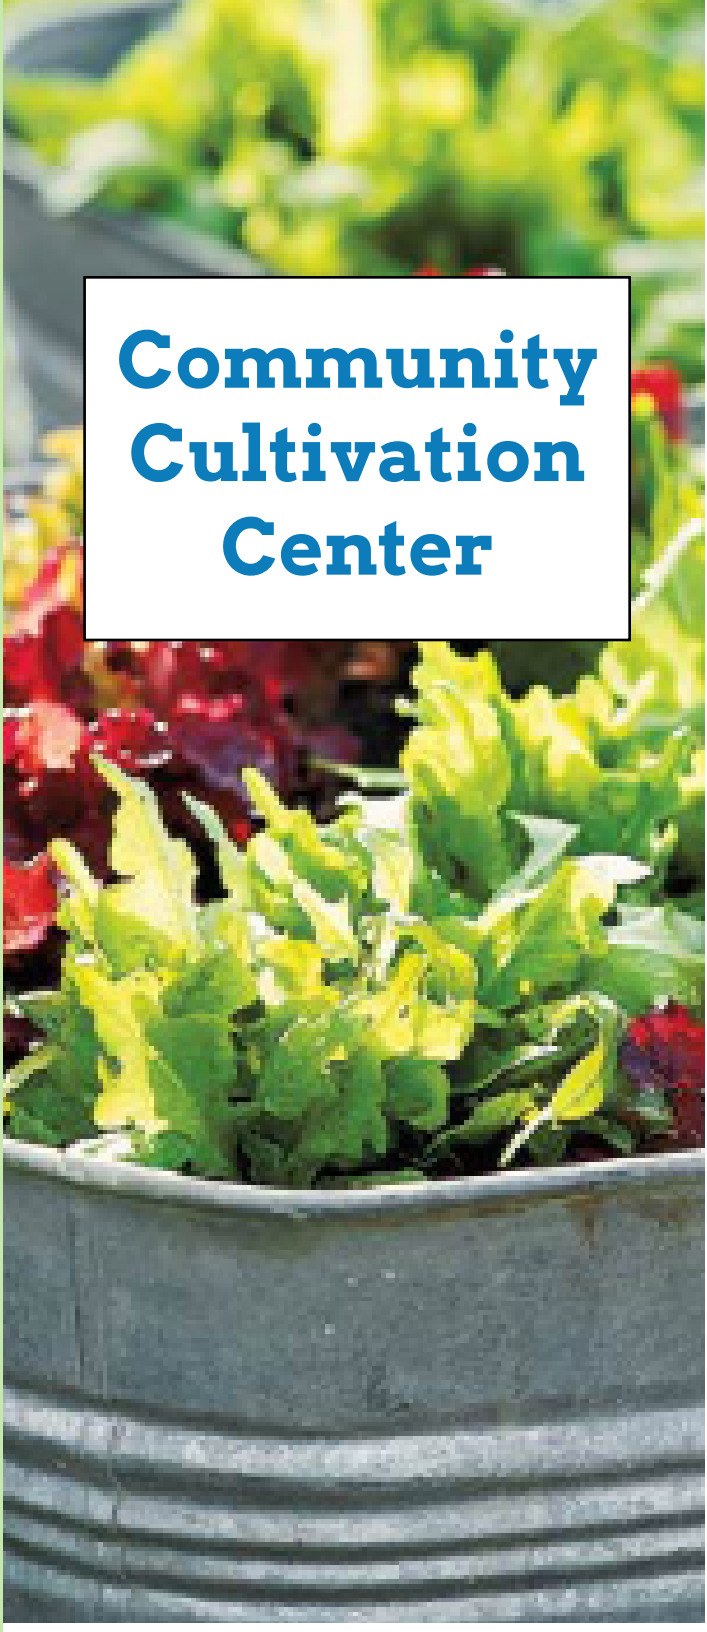

Community cultivation center was created by a group of seniors at Los Osos High School. It was an idea inspired by projects of a similar nature. Our CEO and Founder, Daniel Purcell, hoped to fill in the gaps these programs left. We hope to help the community in ways other organizations can't. Other community gardens provide a place to gather but they don't necessarily provide the same sense of family that we will be going out of our way to instill in our gardeners. The board of directors all plan to be directly involved in the project, both as a helping hand and as gardeners themselves. We hope this hands on approach will make us seem more personable and approachable.

Community Cultivation Center

Our Philosophy

Our commitment

We are committed to helping the members of our community when it comes to getting out of the house and being around people. We are committed to sustainability and having a positive impact on the environment.

The community cultivation center is a gardening program for our community. We hope to get people of all ages out of their homes and into a more environmental setting

The community cultivation center is an organization that puts an emphasis on community and the environment. We hope to provide the community with a positive, collective experience. Our garden is open 8:00am-9:00pm during the week and 9:00am-5:00pm on the weekends. Members of the community will have the ability to purchase a 10x10 plot. Our group will provide a social experience for

individuals who enjoy gardening. Once a week on Friday we will have a non-mandatory group gardening session from 4-6. This session is designed to improve the general quality of life for the people involved in our program. With our community growing bigger, we need more programs that will keep us connected. Our goal is to provide a positive experience for our growing community!

Expenses

Each plot costs {A certain amount of money}. Water will be paid for by the Community Cultivation Center. All you would need to provide is seeds. However, gardening tools are first come, first serve.
